

Havering Over 50s Forum- 10 June

General NHS update

Melissa Hoskins
Communications and Engagement Manager
BHR CCGs

Brexit

- The NHS in east London is focusing on plans for EU Exit
 - Assuming 'no deal' until something else happens
 - The NELCA EU Exit Senior Responsible Officer, Charlotte Fry, has been working with all CCG, acute and community trust leads to ensure adequate plans are in place ahead of EU Exit
 - Assuring NHS England of our preparedness.

BHRUT clinical strategy

Work starting on new clinical strategy for BHRUT

Considering options for urgent and emergency care in the context of a wider integrated health and care strategy.

New, clinically-led model will be developed including how emergency care will be provided from King George hospital (KGH). KGH A&E is not closing

Shortages of paediatric and A&E doctors and nurses and growing demand for emergency care

Need a new, fit-for-purpose model for emergency care that addresses these issues and delivers care that local people need within available resources

NHS will engage/consult fully and openly with the public. No secret plans.

Long Term Plan and STP refresh

The recently published Long Term Plan fits well with plans already in place for our local STP – the East London Health & Care Partnership

Confirms we are on right path locally

Now need to ‘refresh’ those plans – with your help

Three local Healthwatch organisations leading local engagement work, supported by NELCA (North East London Commissioning Alliance)

The NHS Long Term Plan sets out the ambitions to transform our health and social care over the next 10 years

Making sure everyone gets the best start in life

- reducing stillbirths and mother and child deaths during birth by 50%
- ensuring most women can benefit from continuity of carer
- providing extra support for expectant mothers at risk of premature birth
- expanding support for perinatal mental health conditions
- taking further action on childhood obesity
- increasing funding for children and young people's mental health
- bringing down waiting times for autism assessments
- providing the right care for children with a learning disability
- delivering the best treatments available for children with cancer.

Delivering world-class care for major health problems

- preventing 150,000 heart attacks, strokes and dementia cases
- preventing 14,000 premature deaths through education and exercise to patients with heart problems
- saving 55,000 more lives a year by diagnosing more cancers early
- investing in spotting and treating lung conditions early to prevent 80,000 stays in hospital
- spending at least £2.3bn more a year on mental health care
- helping 380,000 more people get therapy for depression and anxiety by 2023/24
- delivering community-based care for 370,000 people with severe mental illness a year by 2023/24.

Supporting people to age well

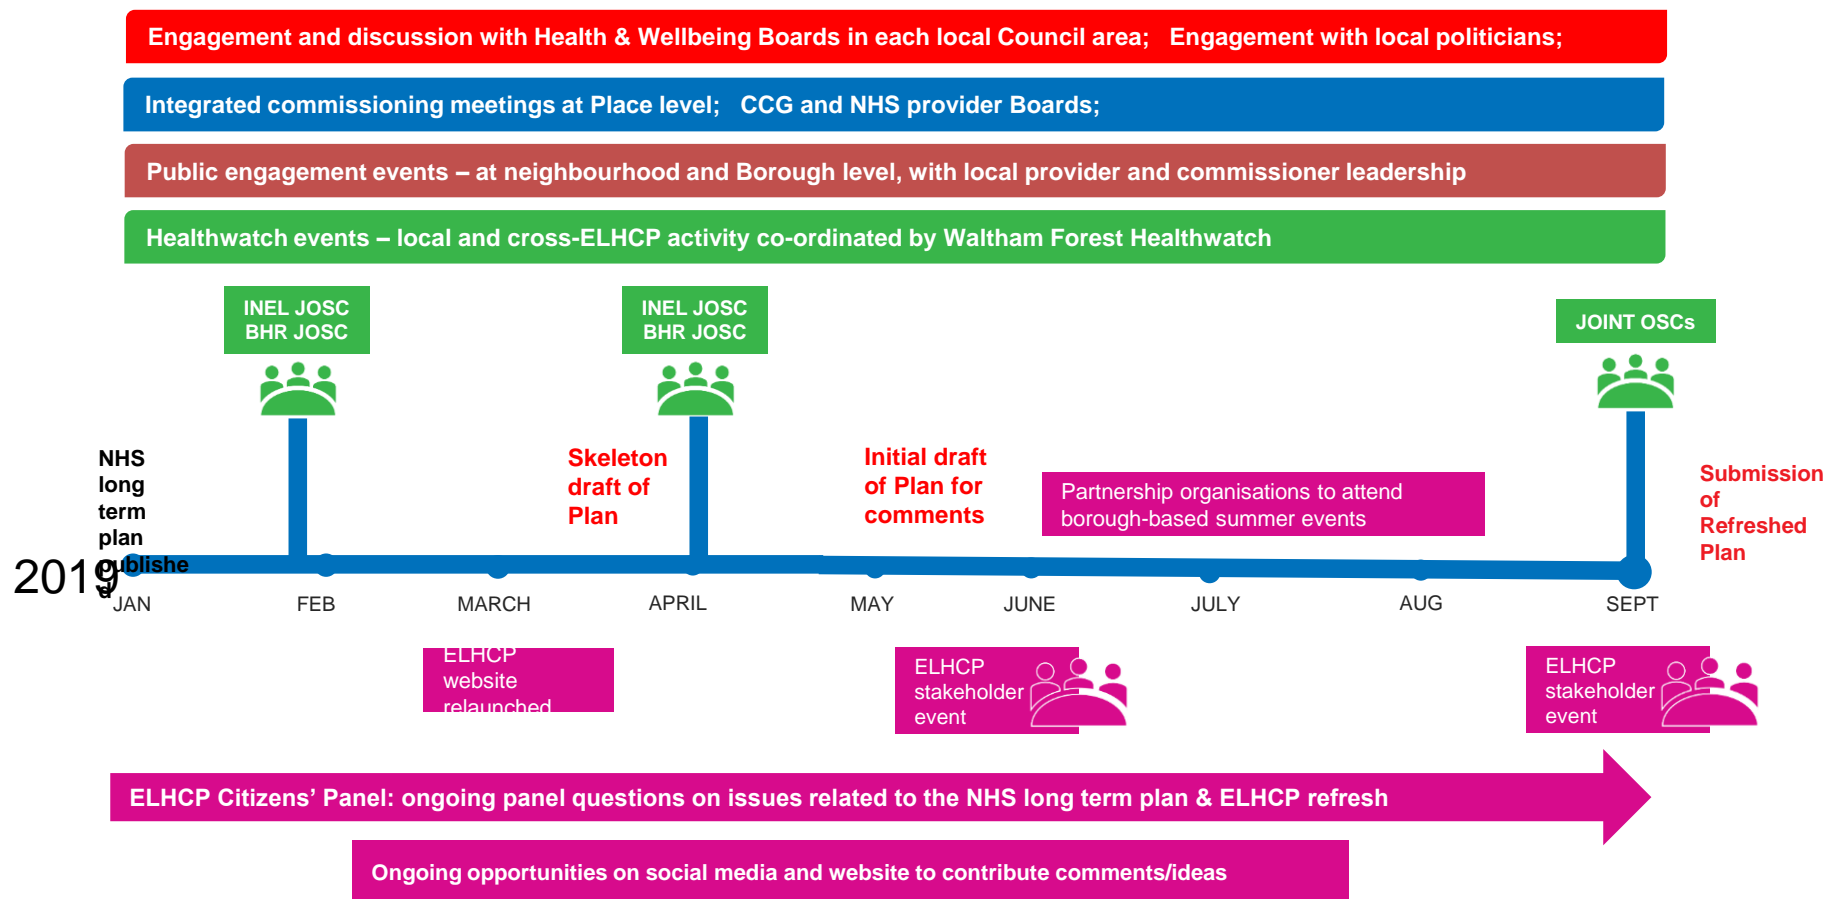

- increasing funding for primary and community care by at least £4.5bn
- bringing together different professionals to coordinate care better
- helping more people to live independently at home for longer
- with more rapid community response teams to prevent unnecessary hospital spells and speed up discharges
- upgrading NHS staff support to people living in care homes.
- improving the recognition of carers and support they receive
- making further progress on care for people with dementia
- giving more people more say about the care they receive and where they receive it

We will do this by:

- **Doing things differently** – giving people more control of their care, joining services up, more care closer to home
- **Preventing ill health** – increasing health prevention initiatives
- **Increasing the workforce** – making the NHS a better place to work, creating more routes into the NHS, and recruiting more professionals
- **Increasing digital** – make accessing the NHS more convenient, better digital services and patient records, improved use of data for planning
- **Value for money** – reduce duplication, and spend on administration

Refreshing the ELHCP Strategy: High Level Engagement Timetable

Other issues

St George's Hospital – funding routes being investigated. Now being managed at a North East London level, but SGH remains a priority for the estates programme.

Blood testing services – aware of issues within Havering. Working with our service providers and with our Council partners (Health Scrutiny) to look at operational changes and a major review of blood testing services across BHR.

Community urgent care – thank you for your support for last year's 14-week consultation. In November, the CCGs agreed to proceed with option 1 – four Urgent Treatment Centres (including Harold Wood Polyclinic) and 8 bookable services (GP hubs). South Hornchurch Health Clinic will change from walk-in to bookable (through NHS 111).
