St George's Health & Wellbeing Hub

Overview of model & Services

Presentation for the Over Fifties Forum

- The purpose of the presentation is to update the Forum on the services within the Health and Wellbeing hub.
- The project is in its very last phase of approval which is called Gateway 3.
- On 2nd November 16 members of the project board, including Healthwatch will each have a one-to-one interview with the Gateway review team. This is a ministerial team from the Department of Health and Social Care (DHSC) and is the last step in the business process.
- The purpose is to examine programmes and projects at key decision points in their lifecycle. It looks ahead to provide assurance that they can progress successfully to the next stage, improve efficiency, gain better value for money from their commercial activities and deliver improved success. The Process is best practice in central civil government, the health sector, local government and Defence.

Integrated Care Model
