

GLF Transport Sub Committee January 2023

Survey - **How Age Friendly is the London Transport System?**

Transport plays a vital role in maintaining independence and well-being, as well as ensuring that communities are connected, and services and amenities can be reached.

Neighbourhoods flourish where they are integrated with a transportation network offering a variety of options, including community transport and dial-a-ride schemes.

Are you satisfied with the system of transport offered in your borough for older people?

YES

NO

If YES can you list the options which are available.

If NO please give your reason. Please let us know what in your view would work more efficiently.

Other interventions are also important, for example, improving the physical accessibility of buses (low-floor buses and minimum door widths); positioning bus stops at key locations with user-friendly seating; and clear, legible and standardised signage at transport intersections.

Are you satisfied with the physical accessibility of buses in your borough?

YES

NO

If NO please give your reason. Please list in order of priority.

Finally, encouraging more active travel, through walking and cycling, can lead to healthier ageing.

Do you feel that your local authority should do more to encourage active travel?

YES

NO

If YES please give your view on how active travel should be addressed in your borough. Please include your forum's good practice in encouraging active living.
